

# REUSING CCRs

Ameren Missouri actively markets CCRs as ingredients in the production of cement and concrete.

## Benefits of reusing CCRs:

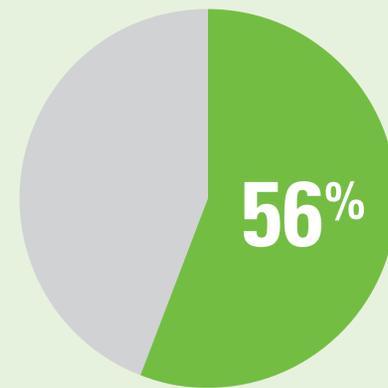

- Reduce need for raw materials
- Lower cost to end buyer
- Lessen need for landfill storage

## Beneficial use:

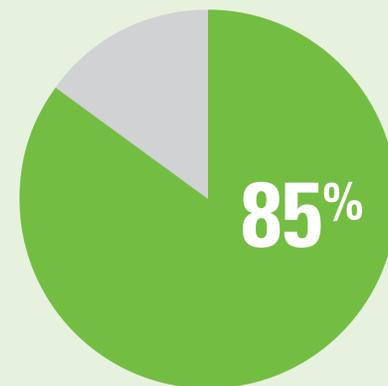

Recycling or reuse of coal ash in lieu of disposal. For example, coal ash is an important ingredient in the manufacturing of concrete and EPA supports the responsible use of coal ash in this manner<sup>1</sup>.
