## **3.0 FUGITIVE DUST CONTROL MEASURES IMPLEMENTED**

The following fugitive dust control measures were implemented during the Report period:

### **3.1 ACCESS & HAULAGE ROADWAYS**

Access and haulage roadways were watered as required. Periodic grading was performed on unpaved roadways to remove debris and maintain an adequate operating surface. Coarse aggregate materials were applied as needed to surfaces to mitigate the potential for fugitive dust generation. As conditions warranted, water and/or chemical dust suppressants were applied to unpaved operating surfaces to mitigate potential dust generation. Further, work activities were altered as needed to mitigate the potential for fugitive dust generation.

### **3.2 CCR POND FACILITIES**

Surface grading was performed to contour and provide windbreaks to mitigate the potential for fugitive dust generation. Surfaces were watered as conditions warranted. Coarse aggregate materials were applied to surfaces to mitigate the potential for fugitive dust generation.

### **3.3 CCR MANAGEMENT OPERATIONS (DIGGING, LOADING, HAULING AND PLACEMENT ACTIVITIES)**

As conditions warranted, work activities were altered. Watering was performed as required. Surfaces were also covered with coarse aggregate materials as needed to mitigate the potential for fugitive dust generation.
