

MAP OF PRELIMINARY ROUTE ALTERNATIVES

The map below shows Preliminary Route Alternatives for the portion of the line that is planned to be routed around the west side of Wataga. These preliminary routes will be presented in detail to the public at our second round of public open houses. Using routing criteria and comments collected from the community, we will narrow down the number of Preliminary Route Alternatives and present them again to the community at the third round of open houses in October. Finally, using the data and input collected on the remaining routes, our team will select a “primary route” and an “alternate route” for the Knox County Connector Project to present in the application to the ICC. Please visit the interactive map on the project website to view the maps in more detail.
