| **Safety Observation/Suggestion:** | No PID recordings for today due to weather. Snow is heaving and covering over the entire site. No onsite activities except partial road clearing. |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/03/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| **Safety Observation/Suggestion:** | No PID recordings due to no activities onsite. |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/04/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/07/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/08/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/09/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/11/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/14/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/16/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/21/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/21/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/25/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |
| SAM-1 | 905 | 0.0 | N | NA | NA | NA | NA |
| SAM-2 | 901 | 0.0 | N | NA | NA | NA | NA |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 02/28/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/01/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| **Safety Observation/Suggestion:** | END OF DAY; no further readings recorded due to inclemental weather |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/02/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |
| SAM-1 | NA | NA | NA | NA | NA | NA | NA |
| SAM-2 | NA | NA | NA | NA | NA | NA | NA |
| SAM-4 | NA | NA | NA | NA | NA | NA | NA |
| SAM-5 | NA | NA | NA | NA | NA | NA | NA |
| IMPL-A | NA | NA | NA | NA | NA | NA | NA |

| IMPL-L | 1615 | 0.0 | N | NA | NA | NA | NA |

| **Safety Observation/Suggestion:** | END OF DAY; no further readings recorded due to inclemental weather |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/03/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |

| **Safety Observation/Suggestion:** | END OF DAY; no further readings collected |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/03/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |
| SAM-1 | NA | NA | NA | NA | NA | NA | NA |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/04/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/21/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/22/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| IMPL-L | 1323 | 0.1 | Y | Light tar-like odor | NA | NA | NA |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/23/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/25/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/28/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/29/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | No samples taken at this time due to lightening events. |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/30/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | No samples taken at this time due to lightening events. |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 03/31/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| IMPL-L | 946 | 0.0 | N | NA | NA | NA | NA |

| **Safety Observation/Suggestion:** | High readings resulting from loadout of materials. |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/01/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/19/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |
| SAM-1 | 804 | 0.0 | N | NA | NA | NA | NA |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/20/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/21/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/22/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/22/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/25/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/26/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 04/27/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 05/02/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 05/08/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| **Safety Observation/Suggestion:** | |
|---|---|

At the end of the day:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

# PID & GC Readings

| Date: 05/12/2022 | Technician Name: Joshua Richards | Site: Ameren 5th Street - Champaign, IL |
|---|---|---|

**If the handheld PID reading is ≥0.5 ppm for more than 1 min, bring out the Drager Gas Chromatagraph (GC) to that site location that had the high VOC reading to monitor for Benzene. If Benzene is detected, contact someone from the Rolling Meadows Air Team.**

| Daily PID Bump Test | |
|---|---|
| Tank Concentration (ppm) | 100 |
| Bump Test Concentration (ppm) | 100 |

| GC Bump Test (if GC is required) | |
|---|---|
| Tank Concentration (ppm) | NA |
| Bump Test Concentration (ppm) | NA |

| PID Readings | | | | | Drager GC (only if VOC ≥0.5 ppm) | | |
|---|---|---|---|---|---|---|---|
| Site Name | Time (CST) | Average VOC Concentration (ppm) | Odor Present? (Y/N) | Comments (Describe odor, if detected) | Benzene Concentration (ppm) | Benzne Concentration upwind (ppm) | Comments (Describe odor, if detected) |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| | Flow Verification (LPM): | 3.01 LPM | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | No | |
| Fastened instrument cabinets and locked security fencing? | | Yes | No | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| Battery swapped and hooked up old battery for recharge? | | Yes | No |
| Fastened instrument cabinets and locked security fencing? | | Yes | No |

Observations (Site Conditions, Equipment Conditions, etc.):

Alarm Details: N/A

Additional Comments:

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| As-Left (If adjusted) | DustTrak Clock Time (CST) | 0751 | | |
| | Flow Verification (LPM): | 3.00 LPM | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | No | |
| Fastened instrument cabinets and locked security fencing? | | Yes | No | |
| Battery swapped and hooked up old battery for recharge? | | Yes | No | |
| Fastened instrument cabinets and locked security fencing? | | Yes | No | |

## Stationary Air Monitor #2

| | | | | |
|---|---|---|---|---|
| **Time (CST)** | | 0845 | | |
| Is site free of damage or vandalism? | | [Yes] | No | |
| Are any alarms present on the DustTrak? **If yes, please provide alarm details.** | | Yes | [No] | |
| **During as-found check**, was impactor oil applied to the sample inlet? This should be completed once per day. | | Yes | [No] | |
| As-Found | DustTrak Clock Time (CST) | 0833 | | |
| | Flow Verification (LPM): | 3.04 LPM | | |
| As-Left (If adjusted) | DustTrak Clock Time (CST) | 0833 | | |
| | Flow Verification (LPM): | 3.04 LPM | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | [No] | |
| Fastened instrument cabinets and locked security fencing? | | [Yes] | No | |

Observations (Site Conditions, Equipment Conditions, etc.):

Alarm Details: N/A

Additional Comments:

Solars panels installed, no battery swap

## Stationary Air Monitor #4

| | | | | |
|---|---|---|---|---|
| **Time (CST)** | | 0845 | | |
| Is site free of damage or vandalism? | | [Yes] | No | |
| Are any alarms present on the DustTrak? **If yes, please provide alarm details.** | | Yes | [No] | |
| **During as-found check**, was impactor oil applied to the sample inlet? This should be completed once per day. | | Yes | [No] | |
| As-Found | DustTrak Clock Time (CST) | 0820 | | |
| | Flow Verification (LPM): | 3.03 LPM | | |
| As-Left (If adjusted) | DustTrak Clock Time (CST) | 0820 | | |
| | Flow Verification (LPM): | 3.03 LPM | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | [No] | |
| Fastened instrument cabinets and locked security fencing? | | [Yes] | No | |

Observations (Site Conditions, Equipment Conditions, etc.):

Alarm Details: N/A

Additional Comments:

Solars panels installed, no battery swap

## Stationary Air Monitor #5

| | | | | |
|---|---|---|---|---|
| **Time (CST)** | | 0845 | | |
| Is site free of damage or vandalism? | | [Yes] | No | |
| Are any alarms present on the DustTrak? **If yes, please provide alarm details.** | | Yes | [No] | |
| **During as-found check**, was impactor oil applied to the sample inlet? This should be completed once per day. | | Yes | [No] | |
| As-Found | DustTrak Clock Time (CST) | 0813 | | |
| | Flow Verification (LPM): | 2.85 LPM | | |
| As-Left (If adjusted) | DustTrak Clock Time (CST) | 0815 | | |
| | Flow Verification (LPM): | 3.03 LPM | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | [No] | |
| Fastened instrument cabinets and locked security fencing? | | [Yes] | No | |

Observations (Site Conditions, Equipment Conditions, etc.):

Alarm Details: N/A

Additional Comments:

Solars panels installed. Battery died sometime in the night: battery swapped with full charge

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

Alarm Details: N/A

Additional Comments:

Applied impactor oil @ 1047 (sn=6002065)

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| | Install Time | NA | | | | |
| Battery swapped and hooked up old battery for recharge? | | Yes | No | | | |
| Fastened instrument cabinets and locked security fencing? | | Yes | No | | | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | Snow covers the solar panels causing the stations to malfunction over the weekends when no one is onsite to maintain. |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| | 20220207 - 09 - SW - SAM 5 | 0814 | 02/07/2022 | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

## SKC Pump SAM #1

| | | | | |
|---|---|---|---|---|
| **Time (CST):** | | **1025** | | Observations (Site Conditions, Equipment Conditions, etc.): |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: Ending flow rate = 2.01 LPM |
| Sample Removed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - SE - SAM 1 | 0940 | 02/25/2022 | |
| **Flow Verification** | | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | | |
| As Found Flow Verification (LPM): | | 1.94 | | |
| **Was the flow adjusted?** | | Yes | No | |
| As Left Flow Verification (LPM): | | 2.01 | | |
| Sample Installed | Sample ID: | Time | Date | |
| | 20220223 - 25 - SE - SAM 1 | 0900 | 02/23/2022 | |

## SKC Pump SAM #2

| | | | | |
|---|---|---|---|---|
| **Time (CST):** | | **1025** | | Observations (Site Conditions, Equipment Conditions, etc.): |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: Ending flow rate = 1.95 LPM |
| Sample Removed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - SE - SAM 2 | 0931 | 02/25/2022 | |
| **Flow Verification** | | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | | |
| As Found Flow Verification (LPM): | | 1.97 | | |
| **Was the flow adjusted?** | | Yes | No | |
| As Left Flow Verification (LPM): | | 2.01 | | |
| Sample Installed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - SE - SAM 2 | 0846 | 02/23/2022 | |

## SKC Pump SAM #3

| | | | | |
|---|---|---|---|---|
| **Time (CST):** | | **1025** | | Observations (Site Conditions, Equipment Conditions, etc.): |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: Ending flow rate = 1.99 LPM |
| Sample Removed | Sample ID: | Time | Date | |
| | 20220223 - 25 - NE - SAM 3 | 0935 | 02/25/2022 | |
| **Flow Verification** | | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | | |
| As Found Flow Verification (LPM): | | 1.96 | | |
| **Was the flow adjusted?** | | Yes | No | |
| As Left Flow Verification (LPM): | | 2.01 | | |
| Sample Installed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - NE - SAM 3 | 0858 | 02/23/2022 | |

| SKC Pump SAM #4 | | | | Observations (Site Conditions, Equipment Conditions, etc.): |
|---|---|---|---|---|
| **Time (CST):** | | **1025** | | |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: End flow rate = 2.08 LPM |
| Sample Removed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - NW - SAM 4 | 0954 | 02/25/2022 | |
| **Flow Verification** | | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | | |
| As Found Flow Verification (LPM): | | 1.88 | | |
| **Was the flow adjusted?** | | Yes | No | |
| As Left Flow Verification (LPM): | | 2.00 | | |
| Sample Installed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - NW - SAM 4 | 0911 | 02/23/2022 | |

| SKC Pump SAM #5 | | | | Observations (Site Conditions, Equipment Conditions, etc.): |
|---|---|---|---|---|
| **Time (CST):** | | **1025** | | |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: End flow rate = 2.08 LPM |
| Sample Removed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - SW - SAM 5 | 0948 | 02/25/2022 | |
| **Flow Verification** | | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | | |
| As Found Flow Verification (LPM): | | 1.95 | | |
| **Was the flow adjusted?** | | Yes | No | |
| As Left Flow Verification (LPM): | | 2.01 | | |
| Sample Installed | Sample ID: | Time (CST) | Date | |
| | 20220223 - 25 - SW - SAM 5 | 0905 | 02/23/2022 | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

| As Left Flow Verification (LPM): | | 2.02 | | |
| Sample Installed | Sample ID: | Time (CST) | Date | |
| | 202204120 - 0422 - SE - SAM 5 | 0755 | 04/20/2022 | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

|---|---|---|---|
| **Time (CST):** | | **1233** | |
| Is site free of damage or vandalism? | | Yes | No |
| Is the SKC pump still running? | | Yes | No |
| Sample Removed | Sample ID: | Time (CST) | Date |
| | 20220502 - 0502 - SE - SAM 2 | 1310 | 05/04/2022 |
| **Flow Verification** | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | |
| As Found Flow Verification (LPM): | | 1.97 | |
| **Was the flow adjusted?** | | Yes | No |
| As Left Flow Verification (LPM): | | 1.99 | |
| Sample Installed | Sample ID: | Time (CST) | Date |
| | 20220502 - 0502 - SE - SAM 2 | 0939 | 05/02/2022 |

Observations (Site Conditions, Equipment Conditions, etc.):
Justin and Drew (ERM) onsite to remove equipment.

Additional Comments: Ending flow rate = 2.08 LPM

## SKC Pump SAM #3

| | | | |
|---|---|---|---|
| **Time (CST):** | | **1233** | |
| Is site free of damage or vandalism? | | Yes | No |
| Is the SKC pump still running? | | Yes | No |
| Sample Removed | Sample ID: | Time | Date |
| | 20220502 - 0502 - SE - SAM 3 | 1300 | 05/04/2022 |
| **Flow Verification** | | | |
| **Taget Flow = 2 LPM ± 5% (0.1 LPM).** If the As Found Flow Verification is found outside the Target Flow, than the flow must be adjusted to 2 LPM. | | | |
| As Found Flow Verification (LPM): | | 1.99 | |
| **Was the flow adjusted?** | | Yes | No |
| As Left Flow Verification (LPM): | | 1.99 | |
| Sample Installed | Sample ID: | Time (CST) | Date |
| | 20220502 - 0502 - SE - SAM 3 | 0930 | 05/02/2022 |

Observations (Site Conditions, Equipment Conditions, etc.):
Justin and Drew (ERM) onsite to remove equipment.

Additional Comments: Ending flow rate = 2.07 LPM

| SKC Pump SAM #4 | | | | Observations (Site Conditions, Equipment Conditions, etc.): |
|---|---|---|---|---|
| **Time (CST):** | | **1233** | | Justin and Drew (ERM) onsite to remove equipment. |
| Is site free of damage or vandalism? | | Yes | No | |
| Is the SKC pump still running? | | Yes | No | Additional Comments: End flow rate = 2.07 LPM |
| Sample Removed | Sample ID: | Time (CST) | Date | |

| **Safety Observation/Suggestion:** | |
|---|---|

Before leaving site:

1. Document site visit in site log
2. Scan all forms associated with site check acitvities and the site log into site laptop memory
3. Note any supplies needed
4. Confirm all analyzers are in "operate" mode
5. Lock door and gate

After site check, distribute form to ERM project team: ERM.NorthernDivisionAirMonitoring@erm.com within **24 hours** of site check.

**ERM has over 160 offices across the following countries and territories worldwide**

Argentina
Australia
Belgium
Brazil
Canada
China
Colombia
France
Germany
Ghana
Guyana
Hong Kong
India
Indonesia
Ireland
