

Common Terms and Definitions on Customer Energy Statements

The following are common terms and definitions which appear on your Ameren Missouri electric and/or natural gas energy statement. For additional information about your energy statement, visit AmerenMissouri.com/Statement.

Amount Due – Total amount due at the end of each billing period. It includes your usage charge, applicable charges, and any state and local taxes. Customers participating in voluntary programs (such as Dollar More and Pure Power) may see these reflected in their current charge detail.

Account Number – Private, personal identifier for your account.

Budget Billing Adjustment – If you participate in Budget Billing, you may see a “Budget Adjustment” on your monthly statement. This amount is the difference between the cost of your actual usage that month and your “Budget Bill Amount.”

CCF – Stands for 100 cubic feet and is the basic unit for measuring the volume of natural gas used.

Customer Charge – Recovers costs of providing energy service even if no energy is used in the billing period. Included in the charge are billing, customer support and other supplemental charges. For natural gas service, this also recovers basic natural gas metering costs.

Community Solar Block Energy Charge – Each subscribed block of solar energy through the Community Solar program will be billed at the Community Solar rate each month. This is the number of blocks enrolled times 100 kWh times (\$.1212/kWh), which is \$12.00 per 100 kWh block (community solar rate). This will be a separate line item on your monthly energy statement. The same amount of kWh (number of blocks enrolled times 100 kWh) will be deducted from your regular rate. For example, if you are enrolled in 3 blocks x 100 kWh/block x \$.1212/kWh (community solar rate) = \$36.36 plus your regular energy rate times (900 kWh – 300 kWh) plus other applicable charges. The rate included here is an example. For the current rate, view the Community Solar Tariff (PDF) in the Terms, Definitions & Resources section of the AmerenMissouri.com/Statement webpage.

Credit – The amount of money collected from a customer that is more than the outstanding charges on the account or business.

Current Reading – Shows your meter reading, in kilowatt-hours, as of a specified service period.

Delinquent Amount After Due Date – This specifies the date after which payment is considered “delinquent” and a late pay charge of 1% will be added. If you need help paying your bill,

log in or create an online account at Ameren.com to view a personalized list of all your eligible options.

Delivery Charge – Is applicable to all metered and/or billed CCF (natural gas) and covers the cost of all infrastructure-related investments and services related to the distribution system.

Deposit Amount – The amount of security deposit paid. Often needed for customers who have no payment history or poor payment history.

Deposit Arrears – Reflects past due deposit amounts.

Due Date – The date a payment is due on your account to avoid late fees.

Electric Energy Charge – This is the cost of electricity Ameren Missouri provides for you to use in your home.

Electric Customer Charge – This is the fixed cost of providing service and is based on rate classification.

Energy Efficiency Investment Charge (EEIC) – Reflects costs incurred to provide customers with energy efficiency programs enabled by the Missouri Energy Efficiency Investment Act. This charge can fluctuate and will remain on the monthly energy statement beyond the implementation dates of the program. For a full list of current customer programs, including rebates and incentives, please visit AmerenMissouriSavings.com.

Fuel Adjustment Charge (FAC) – Reflects costs incurred to supply reliable electricity by purchasing fuel or power used to produce electricity. This charge may increase or decrease based on actual costs. Ameren Missouri makes regular filings with the Missouri Public Service Commission (PSC) to reflect changes in fuel costs, purchased power costs and off-system sales revenues.

Infrastructure Replacement Surcharge (ISRS) – This charge reflects the cost of certain natural gas system replacements or improvements and gas facility relocations due to road construction projects since Ameren Missouri’s last natural gas rate adjustment.

kWh (Kilowatt-Hour) – The basic unit for measuring the amount of electricity used. The “Usage Summary” shows how many kilowatt-hours have been used since the previous meter reading. The “Electric Usage History” compares electric usage for the same period year-to-year.

Late Pay Charge – A 1% late charge will be added for any unpaid balances that are paid after the due date.

Lighting Charge – Flat monthly rate, plus an FAC adjustment, for the use of Ameren Missouri-owned lighting installed on a customer's property. The charge includes the cost of installing, owning, operating and maintaining the lights.

Meter Number – The serial number for your meter.

Missouri Local Sales Tax & Municipal Charge – Ameren Missouri collects taxes on behalf of the city and/or county in which you reside. Ameren Missouri also collects sales tax on behalf of Missouri. All taxes are "pass-through" costs only and go to the government entity.

Net Metering Credit – A monetary credit for customers who produce renewable energy, such as solar power, at their home or business. The credit is applied when the amount of renewable energy the customer used is less than what they generated, and the surplus of energy is sent to Ameren Missouri. The surplus energy, known as Net Excess kWh, earns you a credit on your bill. This credit is calculated based on a set rate outlined in the Net Metering tariff, which is updated every two years.

Previous Statement – Shows the amount due in your previous statement.

Previous Reading – Shows your meter reading from the previous billing cycle.

Purchase Gas Adjustment (PGA) – Reflects the cost of natural gas that Ameren Missouri purchases from suppliers and then delivers to our customers. This includes the cost of storing and transporting natural gas to our system. We pass this cost along to customers on a dollar-for-dollar basis. The PGA is based on the number of CCF provided.

Pure Power – This program, which is no longer available for new enrollees, previously allowed participants to support renewable energy development in the Midwest through options like a 100% usage level or the purchase of "blocks" of renewable energy certificates. Existing customers who supported Pure Power can see an associated premium clearly labeled on their energy statement in the Additional Adjustments section. Starting in 2026, a new Community Solar program will replace Pure Power, offering customers a fresh opportunity to engage with renewable energy initiatives.

Reading Type – Shows whether your reading is actual or estimated.

Renewable Energy Adjustment (RESRAM) – Ameren Missouri established the Renewable Energy Standard Rate Adjustment Mechanism (RESRAM) to comply with voter approved legislation that requires 15% of energy produced to be renewable, such as solar and wind. The RESRAM line item is adjusted on an annual basis and may appear as a charge or a credit.

Rush Island Retirement Cost – Ameren Missouri is acting as the servicer for this Public Service Commission-approved charge for an assignee, who owns the rights to the securitized utility tariff charges related to the Rush Island Energy Center retirement. Based on projections, customers are expected to save about \$70 million over a 15-year period versus standard rates.

Service Address – Displays the address where you receive energy service.

Taxes – Missouri, Local and Municipal: Ameren Missouri collects taxes, or municipal charges, on behalf of the city and/or county in which you live. The taxes we collect are passed through to the city/county/state. Municipal taxes may be applied to non-service-related charges, which can include late payment charges, re-connection fees and special contracts. For a list of municipalities impacted by this change, view the PDF located in the Terms, Definitions & Resources section of the AmerenMissouri.com/Statement webpage.

Transfer Amount – Amount transferred from one service account to another.

Unapplied Credit – Credit on a customer account that is not yet reflected in the balance.

Usage – Shows how many kilowatt-hours you have used since the previous meter reading.

Weather Normalization Adjustment Rider (WNAR) – Allows Ameren Missouri to make rate adjustments outside of a general rate case based on non-gas revenue impacts, either positive or negative, for differences between actual versus normal heating degree days. Only revenue effects due to variations in weather apply. Ameren Missouri may request annual changes to the WNAR, subject to approval by the Missouri Public Service Commission.

COMMUNITY SOLAR PILOT PROGRAM

PURPOSE

The purpose of the Community Solar Pilot Program (Program) is to examine the interest of customers in an opportunity to subscribe to a designated solar resource (Resource) within the Company's Missouri service territory.

PROGRAM DESCRIPTION

Program participants will subscribe to and enroll in the Program and by doing so, agree to pay for Solar Blocks of 100 kilowatt-hour (kWh) each that will replace an equivalent kWh amount of electricity they receive from their standard class of service.

AVAILABILITY

Electric service under this Program is only available to full service electric customers currently served by the Company. Customers can replace up to 50% of their average annual energy usage. Customers must qualify for service under either Company Service Classification Residential Service 1(M) or Small General Service 2(M). Customers will be deemed ineligible for the Program if they have received a disconnection notice within twelve (12) months preceding their application.

Participants will be enrolled on a first-come, first-served basis. Participants can enroll or cancel subject to the Program Provisions and Special Terms. Service hereunder is provided through one meter to one end-use customer and may not be redistributed or resold.

DEFINITIONS

Solar Block - 100 kWh of solar energy per billing month. The number of blocks available will be determined by the total estimated average annual production over the life of the Resource.

* Solar Availability Bank - The number of Solar Blocks available for subscription in any given month, for a specific Resource, based on the estimated average annual production over the life of the Resource minus Solar Blocks covered by existing subscriptions.

* Term of Enrollment - The enrollment term shall expire October 13, 2021.

* Resource Term - The resource term shall be 25 years from the date of the Resource being placed into service.

**** MONTHLY BILL**

All terms and conditions of the customer's applicable standard service classification tariff shall apply to this Program with the following exception:

The Solar Blocks supplied under this Program, pursuant to the customer's subscribed amount, will replace an equal amount of kWh the customer would otherwise be billed under their Energy Charge and Energy Efficiency Program Charge.

All other usage-based charges in the customer's applicable tariff schedule will be billed at the actual metered electricity usage.

*Indicates Change. **Indicates Reissue.

COMMUNITY SOLAR PILOT PROGRAM (Cont'd.)

* TERM OF ENROLLMENT

Once a Resource has been placed in service under this Program, enrolled customers that also receive service under this tariff may continue said service for the Resource Term unless they cancel service under the program, and new customers will be allowed to receive service under the Program to the extent there exists a Solar Availability Bank for a given Resource.

If more than one Resource exists under the Program, the remaining length of the Resource Term will depend on the Resource that is assigned to an individual participant. In the event there are available Solar Blocks in the Solar Availability Bank for more than one Resource, the Resource with the shorter remaining Resource Term will be assigned first.

This tariff shall immediately become void, and the Company shall have no further obligations or liabilities hereunder, if any term or terms of this Program are determined to be discriminatory or otherwise unlawful by a court of competent jurisdiction.

PROGRAM PROVISIONS AND SPECIAL TERMS

- 1. Qualifying customers are eligible to subscribe to at least one (1) Solar Block, regardless of their annual usage, as long as they meet all other provisions.
- 2. In any given billing month, an unused Solar Block or portion of a Solar Block subscribed by customer will not be carried over into any subsequent billing month.
- * 3. All rights to the solar renewable energy certificates (SREC) associated with the generation output of the Resource(s) will be owned by the Company and will be retired on behalf of participants within the Commission-approved tracking system.
- 4. Enrollment; Participation Fee; Commitment:
 - * a. The Company may construct new Resources if there are sufficient subscriptions to support the Resources and the Commission approves a Certificate or Certificates of Convenience and Necessity (CCN). Upon grant of a CCN, construction of a new Resource shall not begin until at least 90 percent of the Resource's solar blocks are subscribed or able to be filled through the waitlist.
 - * b. Customers enrolling in the Program will be assigned to the Resources until such time as all of the Solar Blocks for existing Resources are subscribed. If all Solar Blocks are subscribed, a customer may still be placed on a waitlist for a new Resource and, upon enrollment, such customers shall pay a Program participation fee of \$25 per block. Collected Program participation fees will be treated by the Company as a Contribution in Aid of Construction upon construction of the Resource.

APPLYING TO MISSOURI SERVICE AREA

COMMUNITY SOLAR PILOT PROGRAM (Cont'd.)

PROGRAM PROVISIONS AND SPECIAL TERMS (Cont'd.)

c. On and after the date the Company commits to construct a Resource, which commitment shall occur upon the Company posting its commitment on its website and sending an e-mail, if available, or by letter, announcing its commitment to the enrollees assigned to a Resource, said enrollees will be obligated to participate in the Program and pay the charges thereunder for a term of two years after the Resource's in-service date, unless the customer no longer takes service from the Company. Until said committal date, an enrollee may withdraw from the Program via the Company's website or by calling the Company's toll-free customer service line and shall receive a refund of the enrollee's Program participation fee. However, a customer that is a participant in the Program will be permitted to withdraw from the Program before the two-year commitment period has been completed only if a customer on the waitlist for which there is not a Resource available can take the withdrawing participant's place for the Resource, and the withdrawing participant will not be refunded any fees.

* d. Any enrollee from whom a Program participation fee has been collected who has not received service from the Resource by June 30, 2022, will be refunded the Program participation fee.

e. Customers may enroll in the Program via the Company's website or by calling the Company's toll-free customer service line after the Company has committed to build the Resource, and throughout the Program's operation, during any period when there exists a Solar Availability Bank, without paying a Program participation fee. The Company will maintain a waiting list of customers interested in enrolling in the Program during periods when there is no Solar Availability Bank, and will notify customers on the waiting list via e-mail or letter when the Bank becomes available.

f. The Company will continue to share the risk for undersubscribed Resources as discussed in paragraph 15 of the Amended Unanimous Stipulation And Agreement filed in EA-2016-0207.

5. The Solar Generation Charge associated with the Solar Block will be capped for Resource Term at the initially offered level, but may decrease if incremental capacity additions to or retirements from the Resources occur and result in a lower aggregate functionalized generation cost of all Resources placed in service under this Program. The Total Facilities Charge will be subject to adjustment in each general rate case during the applicable Resource Term.

6. Where an additional Resource is added to the Program, the levelized cost of the new Resource will be averaged with the remaining levelized cost of existing Resource to determine the new fixed levelized cost that determines the Solar Generation Charge and contributes to the total cost of the Solar Block. This change would apply to all subscribers under the Program.

7. Payments for Solar Blocks will be due no later than the due date shown on the bill and will be incorporated into the customer's standard billing cycle.

*Indicates Change.

COMMUNITY SOLAR PILOT PROGRAM (Cont'd.)

PROGRAM PROVISIONS AND SPECIAL TERMS (Cont'd.)

- 8. Any customer being served or having been served on this Program waives all rights to any billing adjustments arising from a claim that the customer's service would be at a lower cost had the customer not participated in the Program for any period of time.
- 9. If a customer moves to another location within the Company's Missouri service territory the customer's subscription will also transfer.
- 10. Subscription cancelations will result in available Solar Blocks going back into the Solar Availability Bank. Any surplus of kWh from Solar Blocks will be forfeited back into the Solar Availability Bank without any monetary reimbursement to subscriber.
- 11. After the expiration of any two-year commitment as provided for in paragraph 4.B, customers that subscribe will continue as Program participants until they cancel their subscription or the Program is terminated, whichever occurs first. For enrollments occurring 20 or more days before a customer's next billing cycle, enrollment fees or refunds of participation fees, if otherwise allowed hereunder, shall be charged or credited, as appropriate, via the customer's bill in that next billing cycle; otherwise, in the second billing cycle after enrollment or withdrawal.
- 12. Any customer who terminates Program participation must wait three (3) months after the first billing cycle without a subscription to re-enroll in the Program.
- 13. Customers with Net Metering agreements and customers served on Time-of-Use Service rate schedules other than the Residential Daytime/Overnight rate schedule are ineligible for the Program.
- * 14. Program participants may transfer their subscription to the Community Solar Program (Rider CSP) when a Rider CSP program resource is available for subscription. The solar energy associated the Solar Blocks of a transferring customer's subscription will be converted to an equivalent number of kWh for subscription under Rider CSP.

GENERAL RULES AND REGULATIONS

In addition to the above specific rules and regulations, all of Company's General Rules and Regulations shall apply to service supplied under this Program.
