

The Power To Run Stronger

Identify power quality issues fast with Ameren Missouri's Service Monitoring Program. Most electric power quality issues are caused by interactions between equipment and other difficult-to-pinpoint phenomena. Get the data you need to avoid downtime and equipment damage.

Real-time electric power quality monitoring provides critical knowledge to improve your operation.

Reduce or Eliminate Problems

- Voltage sags and surges
- Lockups and restarts
- Equipment interactions

Save Money

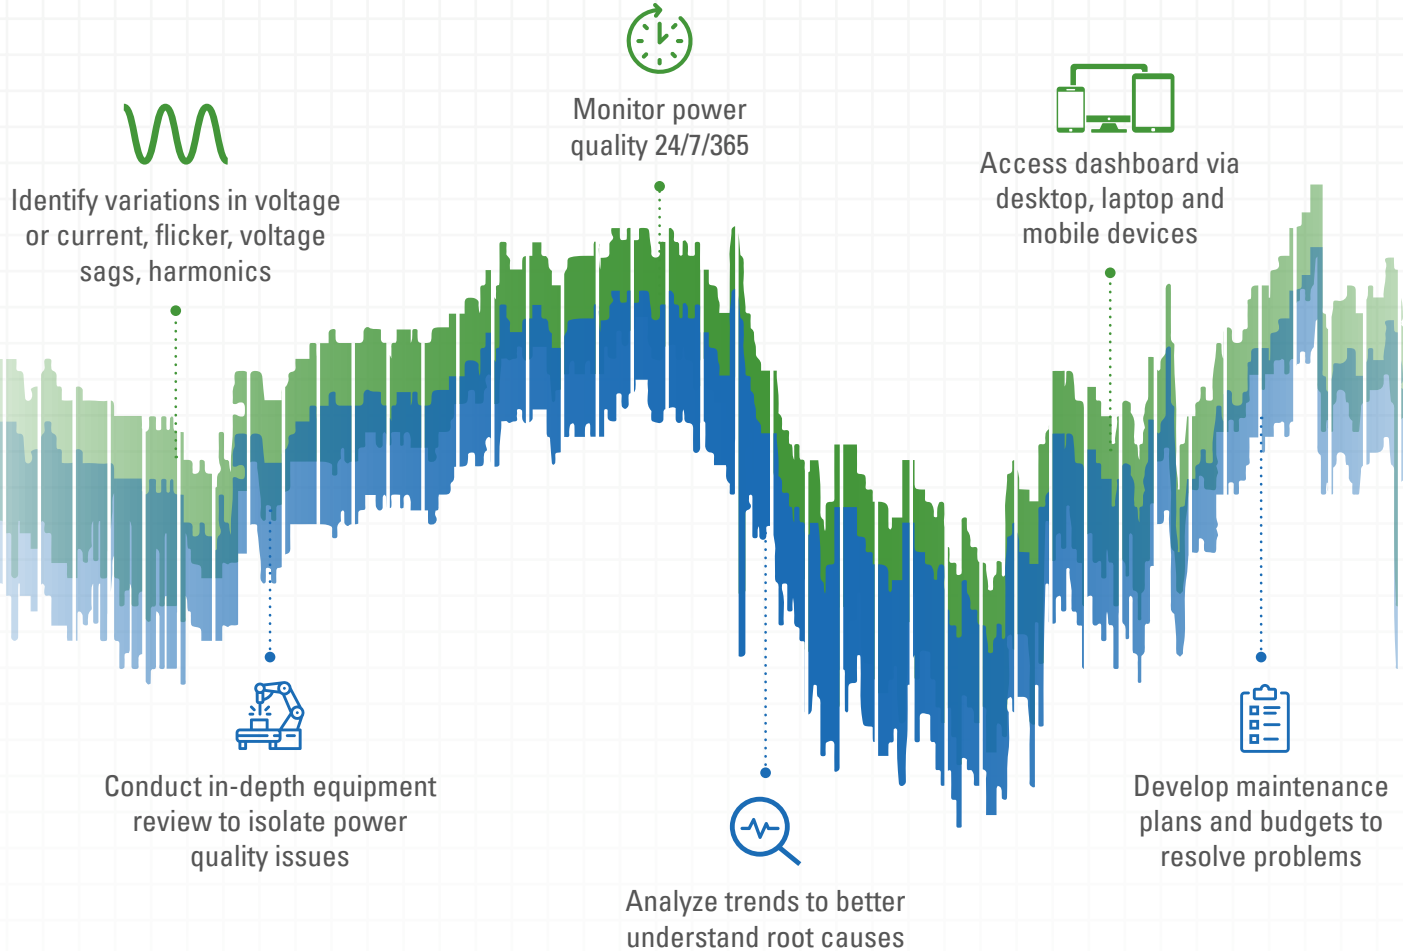

- Reduce downtime
- Avoid equipment damage
- Save energy

Leverage Data

- Waveform capture
- CBEMA graphs
- Harmonic detection

Improve your operation's bottom line with real-time power quality data and alerts.

The right solution: An affordable component of your monthly operations budget

Flat monthly fee of \$500 (+ tax)

Ameren Missouri installs and maintains equipment

Allows cost to be managed on your existing bill as a monthly operational expense

Two-year service agreement
